Superfund Long-Term Human Health Protection Worksheet

Definition: The Long-Term Human Health Protection EI documents the progress achieved towards providing long-term human health protection by measuring the incremental progress achieved in controlling unacceptable human exposures at a site.

Site Name: ORANGE VALLEY REGIONAL GROUND WATER

EPA ID: NJD002148799

CONTAMINATION

HE Survey Status: HE Worksheet Incomplete

Estimated Under Control Date (If not under control):

Estimated LTHHP Control Date (If not under control):

Step 1. Is there sufficient known and reliable information to make an evaluation on human exposures at this site? Answer: Listing Reference Documents:		No	Insufficient Data to Determine Human Exposure Control Status
Yes			
Step 2. Have all human exposure-related cleanup goals been met for the entire site? Answer: Listing Reference Documents:		Yes	Long-Term Human Health Protection Achieved
No			
Skip to Step 5	Step 3. Are there complete human exposure pathways between contaminated groundwater, surface water, soil, sediment or air media and human receptors such that exposures can be reasonably expected under current conditions? Answer: Listing Reference Documents:		
	Yes		
	Step 4. Are the actual or reasonably expected human exposures associated with the complete pathways identified in Step 3 with acceptable limits under current conditions? Answer: Listing Reference Documents:	No	Current Human Exposures Not Controlled
	Yes		
	Step 5. Is the site Construction Complete, is the remedy operating as intended, and are engineering and institutional controls, if required, in place and effective? Answer: Listing Reference Documents:	No	Current Human Exposures Controlled
		Yes	Current Human Exposure Controlled and Protective Remedy in Place
Step 6. Are there continuing exposures at the site? Answer: NO Answer "Yes" only if EPA (or a state or PRP) has extended all response actions and legal authorities to prevent unacceptable human exposures, yet exposures continue due to a refusal by the property owner(s) to participate in the remedy (e.g., refusal to accept a municipal water supply hookup) AND the region wishes to exercise its discretion to classify this site as Human Exposure Under Control, consistent with the requirements laid out in the Superfund Environmental Indicators Guidance (OSWER 9285 02, March 2008, pages 4-10 and 4-11).
